

# RECYCLING SCREEN SBR 4

SEMIMOBIL

EINFACH  
AUFBEREITEN

robust

flexible

maintenance free

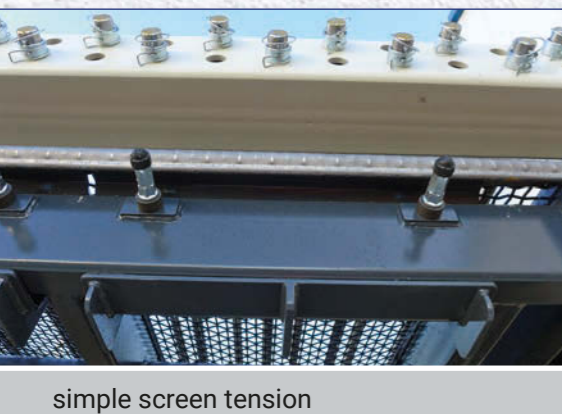

Made  
in Germany

[www.einfach-aufbereiten.de](http://www.einfach-aufbereiten.de)

direct excitation

simple screen tension

optimized vibration damping

poles separator for pre-separation

## Robust technology for the highest economic efficiency

Developed for use in asphalt mixing plants, recycling and extraction companies, as well as on construction sites, optimized for loading by wheel loader with approx. 4 m<sup>3</sup> bucket capacity

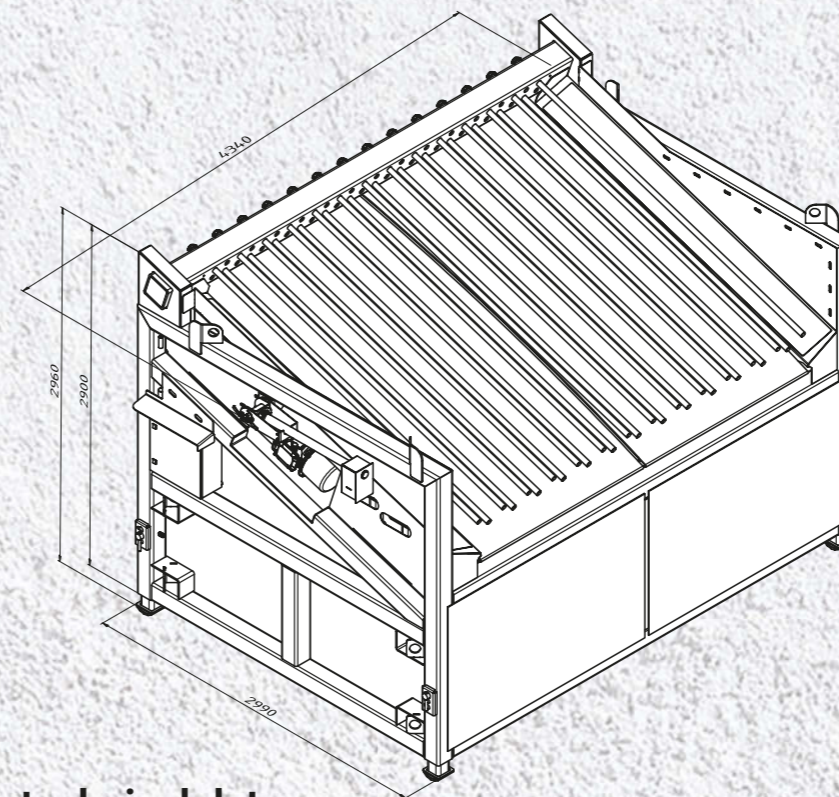

### For the processing of:

- asphalt milled material
- construction rubble
- excavation mixture
- topsoil, humus
- gravel, grit and sands
- slags, metal scrap, etc.

Reduces operating, logistics, disposal and crushing costs in mobile and stationary use

### Your advantages:

- great power combined with a long screen track for quick loading and small separating cuts
- electrical operation for low operating costs and emissions
- automatic ON-OFF for flexible operation
- high mass throughput: approx. 140 t /h
- flexible use due to simple screen change: < 60 minutes
- easy height and tilt adjustment to adapt to wheel loader and material
- low noise emissions: Lwa 103 dB

### technical data

- Transport dimensions: width 4,340 mm  
depth 2,990 mm  
height 2,900 mm without feet  
2,960 mm with feet
- screen track: length 3,000 mm  
width 3,200 mm
- entry height: approx. 2,900 to 3,900 mm
- total weight: approx. 5,7 t
- driving power: 4 kW
- power connection: 16 A CEE / 400 V
